EXPERIENCE

Software Engineer

Alice Blue Financial Services Pvt. Ltd.

📍 Bengaluru | Apr 2024 – Present

Responsibilities:

- Developed scalable frontend applications using Angular and Vue.js
- Integrated REST APIs for real-time financial data (SIP, mutual funds, portfolios)
- Developed reusable UI components for dashboards and workflows
- Improved application performance using lazy loading and code splitting
- Collaborated with backend teams for secure and efficient API integration
- Improved UI responsiveness and overall user experience

PROJECTS

Client 360 (Angular 16, REST APIs)

- Built centralized dashboard aggregating client data from multiple systems
- Developed real-time API integration for seamless data updates
- Improved performance and load time for better user experience

Middleware Rise (Angular 17)

- Implemented role-based authentication and secure access control
- Built logging and request tracking system for monitoring
- Designed UI for managing workflows and configurations

Rise (Vue.js, Vuex/Pinia)

- Rebuilt investment platform with modern UI using Vue.js
- Integrated APIs for portfolio, SIP, and mutual fund data
- Optimized performance using lazy loading and state management

PEKYC (Vue.js, REST APIs)

- Developed responsive UI components for partner onboarding and eKYC workflows
- Integrated REST APIs and implemented form validations for seamless user experience
- Built reusable components and optimized application performance
